CAMBRIDGE, OHIO. ACI Services Inc. has purchased the assets and intellectual property of Gas & Air Specialty Products Inc. GAS Products, located in Blue Springs, Missouri, U.S.A., designs and manufactures high quality unloaders, valves, and valve components, including its highly efficient radial poppet valve and unloader product line, as well as a wide array of poppet valve repair components for reciprocating gas and air compressors. Brett Kyle has been named Operations Manager of the GAS Products facility, which will operate as a division of ACI Services.

Lauren D. Sperry, former president of GAS Products, has assumed the new position of Sr. Manager, Product Development at ACI. "The GAS Products technology and products are complimentary to ACI's offerings, expanding our industry leading portfolio of compressor revitalization, optimization, and automation products. We are pleased to have the GAS Products staff on our team, and we're looking forward to working with Mr. Sperry to bring more of his patented products into production," said W. Norm Shade, President of ACI. "In parallel with this acquisition, we are installing a closed loop compressor test facility at our Cambridge plant to support our ongoing development of compressor performance control and improvement products," he added.

ACI Services Inc., headquartered in Cambridge, Ohio, U.S.A., is a leading provider of performance optimization, automation systems, and engineered products and solutions for reciprocating compressors. Its products and services include a wide range of compressor performance control and unloading devices, custom engineered cylinders, components, modeling software and replacement parts. <http://www.ACIServicesInc.com>
